### **Abstract**

nce of innovatization of planning institutions in the system of Russian economic management, describes the continuous planning as an alternative to periodical planning, as well as the collaborating system of institutions affecting the management efficacy in the Russian economy and an institutional form of struggle with losses produced by both positive and negative factors of management. The study has focused on the importance of innovatization of planning institutions in the system of Russian economic management, described the continuous planning as an innovative alternative to traditional periodical planning, as well as the collaborating system of institutions affecting the management efficacy in the Russian economy and an institutional form of struggle with losses produced by both positive and negative factors of management. The originality of the study is that the innovatization of planning institutions has been presented as a process of accumulation, preservation, use and development of the innovation potential of institutions in the system of collaboration among the business, authorities and society in the Russian economic management. A thesis is substantiated on the need for replacement of traditional institutions of periodic planning by innovative continuous planning institutions. It is proved that such replacement increases the efficiency of the institutional forms of struggle with losses produced by both positive and negative factors of the Russian economic management.
